Prashan Chamara

Head of Admin & Digital Solutions Specialist

Dubai, UAE | +971 58 827 4266 | prashanchamara.a@gmail.com

Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Highly versatile and results-driven Head of Administration and Full-Stack Developer with over 19 years of diversified experience bridging the gap between complex business operations and modern technology. Uniquely qualified as a dual-threat professional: capable of leading administrative teams and managing HR workflows while simultaneously architecting and deploying custom ERP software solutions. Expert in using Python (Flask), MySQL, and cloud technologies to automate manual processes, resulting in significant cost savings and operational efficiency. Passionate about building user-friendly digital tools that solve real-world business problems while maintaining the highest standards of administrative excellence.

CORE COMPETENCIES

Strategic Admin

Contract Negotiation, Sponsorship Acquisition, Vendor Management, Operational Planning, and Policy Formulation. Experienced in utilizing Google Workspace and Office packages.

Financial Management

Branch Cash Flow Analysis, Budget Forecasting, Petty Cash Reconciliation, and Recurring Invoicing. Skilled in handling e-commerce platforms and maintaining audit compliance.

Full-Stack Dev

Building helpful web apps using Python (Flask), HTML, CSS, JavaScript, and Bootstrap. Experienced in deploying projects on Linux servers and hosting via GitHub.

Digital Marketing

Meta Ads Strategy, SEO & Reputation Management, and Content Writing. Passionate about designing beautiful web layouts and digital assets using tools like Canva.

KEY TECHNICAL PROJECTS

Tux Talks — Agentless DevOps Dashboard

Community / Open-Source

2026

Python 3 (Flask), Paramiko, AES-256-GCM, Vanilla JS, Tailwind CSS

- Architected and developed an agentless, high-performance server management platform allowing complete Linux fleet control via standard SSH connections, entirely eliminating the need for server-side daemons.
- Engineered a robust security architecture featuring AES-256-GCM encrypted credential storage and single-tenant session-based master password authentication.
- Developed 14 comprehensive management pillars, including live Docker container control, visual cronjob scheduling, UFW firewall management, one-click Git deployments, and real-time resource monitoring.
- Designed a responsive, user-friendly Glassmorphism UI focused on simplifying complex terminal workflows for administrators without technical bloat.

Desert Cubs Admin Portal (ERP)

Live Project

Python (Flask), MySQL, SQLAlchemy, Bootstrap 5, JavaScript

- Architected and deployed a comprehensive Progressive Web App (PWA) to manage entire academy operations, replacing fragmented spreadsheet workflows.
- Built a complex financial engine for automated, recurring invoices handling pro-rated billing, discounts, and PDF email dispatch.
- Developed an HR & Leave Management Module with dual-approval workflows, integrated with payroll and a touchless QR-Code Attendance System.
- Added features to easily generate, download, and share customized PDF reports for student attendance and revenue tracking.

Turbo Global Luxury Transport

Live Project

HTML5, CSS3 (Custom Properties), Vanilla JavaScript

- Developed a high-performance marketing website for VIP transport utilizing a lightweight SPA routing structure for smooth, instant navigation.

PROFESSIONAL EXPERIENCE

Desert Cubs Sports Academy

Feb 2022 - Present

Head of Admin & Digital Solutions Specialist | Dubai, UAE

- Serve as the primary point of contact for external business dealings, successfully negotiating SLAs with facility providers and vendors.
- Spearhead sponsorship acquisition by creating pitch decks and negotiating funding deals for tournaments.
- Operate as de facto Branch Manager for the SIS location, overseeing daily financial transactions, PDC management, and payroll for 25+ staff.
- Super Admin for Google Workspace, managing user provisioning, security, and executing targeted Meta Ads/SEO strategies to drive lead generation.
- Serve as the system administrator for the custom ERP system built in-house, managing user permissions, troubleshooting issues, and catering to all digital needs of the company.

Raffles Consolidated Pvt Ltd

Previous Role

IT Support & Web Developer (Contract) | Sri Lanka

- Designed and deployed a bespoke Web Application to digitize the manual IT Help Desk ticket logging process.
- Reduced ticket resolution time by 30% through categorized urgency assignments and comprehensive audit trails.

Commercial Bank of Ceylon PLC

Previous Role

Banking Assistant | Sri Lanka

- Conducted rigorous QA and scenario-based testing for new online banking platforms.
- Managed complex portfolios of internal staff loans ensuring strict adherence to Central Bank regulations while handling high-volume daily transactions.
